

## **Fever Guidance August 2021**

Individuals with fever 100.4 or greater will need to be sent home or not come to school.

- If vaccinated and have negative COVID and flu test, they may return when fever free for 24 hours.
- If vaccinated and have alternative diagnosis, they may return when appropriate for that diagnosis (e.g. strep, flu, etc.).
- If vaccinated and do not have COVID test and no alternative diagnosis, they may return when fever free for 72 hours.
- Unvaccinated individuals will need to be out of school until 72 hours fever free unless there is an alternative diagnosis and then those guidelines will be followed.
- Individuals diagnosed with influenza will be out of school for a minimum of 7 days from onset of symptoms and 24 hours fever free.
- At this time, previously documented infection counts as of now as similar to vaccinated.
